Description According to Slywotzky, value migration is the flow of economic and shareholder value away from an increasingly outmoded business design toward others that are better equipped to create utility for customers and profit for the company.

Argues that successful new companies are taking on established businesses by developing superior business designs, and argues that the key is anticipating customer priorities

This book includes a new strategic concept to enable managers to understand & anticipate where the value in their business is headed. It identifies & articulates the key principles that form the basis of a sound strategy: understanding the customer & innovative business design. Techniques to help companies develop profitable business models are described. It shows companies how to act aggressively to capitalize on the opportunities they create.

Drawing upon several years of research in Germany, the UK, Spain, and Austria, and over 100 interviews with Peruvian, Ecuadorian and Chilean women working as domestic and care workers, this book examines hitherto unexplored areas of the interpersonal relationships between domestic and care workers and their employers.

Societies today are in a period of dynamic change, highly fluid and contested in moving from traditional to liberal and from local to global, as well as varying from highly developed to emerging market economies. Alongside and facilitating this is a rapidly and exponentially changing digital media industry, including new technologies, multi-platform distributions and advertising models. This monograph highlights, identifies, evaluates and provides rich insight into the complex nature and meaning of different digital value migration in media corporations and ICT companies. It illustrates how such values affect both the internal and the external

environments of media companies and industries, as well as prosumers' consumption. Including chapters from expert scholars and industry practitioners representing cutting-edge research in the U.S. and Europe in the fields of digital convergence, broadband, media and information communication technology (ICT) business and technology, the book helps academics, researchers, media policymakers and corporate executives better understand today's undulating media and ICT markets. Specifically, it illuminates where they have come from, what is at stake and what forces drive and constrain them in global hypercompetitive markets. Ultimately, it aims relatedly to facilitate high academic, business and professional standards. This text will be of key interest to scholars, students and business and industry practitioners in digital media, media management, international business, media economics and media policy and, more broadly, to those in the cultural industries, strategic management, business studies and marketing.

Migration Decision Making: Multidisciplinary Approaches to Microlevel Studies and Developing Countries discusses several topics, such as systematics review and evaluation of microlevel frameworks and models of the migration decision; applicability of microlevel migration models and framework; and general policy implications of microlevel models and frame works. The opening chapter introduces the main themes and provides an overview of the book. Chapter 2 discusses the motivation for migration, an assessment and a value-expectancy research model, and the next chapter tackles macrolevel influences on the migration decision process. Chapter 4 covers microeconomic approaches to studying migration decisions, while Chapter 5 discusses information, uncertainty, and the microeconomic model of migration decision making. The sixth chapter talks about moving toward a development paradigm of migration, with particular reference to third world countries, and the seventh chapter discusses village-community ties, village norms, and ethnic and social networks. Chapter 8 covers family structure and family strategy in migration decision making, and then Chapter 9 discusses the migration decision-making process, emphasizing some social-psychological considerations. Chapter 10 tackles policy intervention considerations, focusing on the relationship of theoretical models to planning, and Chapter 11 discusses the utility of microlevel approach to migration, using a Philippine perspective. The last chapter is a review of micro migration research in the third world context. This book will be of great interest to sociologists, economists, law makers, and government agencies who are concerned with the implications of migrations.

"Some 10 million migrant workers cross national borders each year and, if they pay an average \$1,000 to recruiters, moving workers over borders is a \$10 billion a year business. Merchants of Labor examines the businesses that move low-skilled workers over national borders, asking how much they collect from migrant workers and what can be done to reduce worker-paid migration costs. Using cost data from over 3,000 workers, Merchants of Labor examines the often murky world of labor brokers, travel agents, and others who move low-skilled workers from one country to another in order to explore lower worker-paid migration costs. It explains the three core functions of labor markets-- recruitment, remuneration, and retention-- and shows how national borders increase recruitment costs. New data on what workers pay to get jobs in other countries are presented, and incentives to

Us and Them? explores the distinction between migrant and citizen through using the concept of 'the community of value'. The challenges of migration go to the heart of equality, rights, freedom, and membership. These are not only matters for migrants but go to the heart of citizens' politics.

Lurid headlines on every aspect of migration have been a consistent feature of the last decade, from worries over asylum seekers to concerns about unprecedented economic immigration from Eastern Europe. This book presents the first comprehensive account of government policy on immigration over the last ten years, providing an in-depth analysis of policy and legislation since Tony Blair and New Labour were first elected. The account begins by placing policy change under Labour in their proper historical context, before examining the key policy themes - economic migration; security; integration; asylum; delivery - of the last decade. Through an analysis of such policy themes, the author contends that immigration policy has undergone an intense and innovative transformation in the period from May 1997 to May 2007. Arguing that a more plural system of governance exists, the author challenges traditional accounts of policy development. By addressing the various influences on immigration policymaking, from globalisation, the European Union and the law, to politics, the media and the networks of special interests, he seeks to provide a holistic explanation for the transformation of immigration policy. The author concludes with an evaluation of Labour's immigration reforms, and whether government policy can be judged a success. The book will be of interest to policymakers, academics, students studying immigration, and readers interested in serious current affairs.
