VDF Boehringer's tradition in horizontal turning dates back to 1844. VDF Boehringer is now one of the leading manufacturers of innovative cycle turning machines for single parts and small batches. It also manufactures turning centers for medium batch sizes and system solutions for crankshaft machining. All VDF Boehringer turning

centers are characterized by maximum stability and durability ...

The story of what one daring entrepreneur with dreams and determination can achieve. Frank Hasenfratz grew up in Hungary learning to dodge bullets and avoid land mines during the Second World War. When the 1956 revolution erupted, he and his army unit joined the insurgents. After the revolution was crushed, he fled to Guelph, Ontario, where he gambled everything on a one-man operation making oil pumps for Ford. The company he founded, Linamar, today has 15,000 employees in eight countries and is the second-largest maker of auto parts in Canada. To create this global empire, Hasenfratz stayed ahead of competitors through hard work, visionary leadership, a cost-conscious regimen, and a skilled workforce. In 1990, Hasenfratz designated his daughter, Linda, to succeed him as chief executive officer but first put her through a prolonged apprenticeship that took her from the plant floor to head office. Driven to Succeed is the story of what one daring entrepreneur with dreams and determination can achieve.

Offers information, know-how & applications based on worldwide experience. Covers aspects of automated manufacturing: from robots to lasers, & from FMS to assembly automation.
