Mantreswar was the greatest astrologer of the 12th century from the South of India. This is one of the best books on Predictive Astrology. It includes the essence of Parashar, Jaimini and many more masters. Bhavartha Bodhini. The 28 chapters in the book cover various topics: the characteristics, house divisions, strength of planets, career, various yogas, raja yogas, marriage, children, longevity, periodic influence of planets, the effect of transits and ashtakvargas. The 11th chapter exclusively deals with the nativity of women; the 22nd chapter gives the interpretations and calculation of the Kalachakra dashas. Stars and planets have always fascinated us. The steady majesty of these cosmic bodies have had a captivating effect on humans from ancient times. Astrology involves the forecasting of mundane events in one's life through analysing planets, fixed stars and their arbitrary combinations called constellation. Astrology uses a set of rules about the relative positions and movements of heavenly bodies to generate predictions and explanations for events and human personality traits. We can understand the unambiguous truth of how Astrology embodies a sense that life on Earth is affected by events in the wider universe, and how it offers hope of making sense of a bewilderingly complicated cosmos, and reassures us that we are a part of its grand design. The motivation behind this book is to establish a comprehensive, concise yet dynamic guide that can help anyone learn this science.
