Accounting: Building Business Skills 4th edition continues to provide students and academics with a well written and accessible textbook, with ample illustrations and applications to business, for a first course in accounting. The text is unique in the way it balances a "user" and "preparer" perspective and integrates real financial information to illustrate business decision choices and how decisions are made using accounting information. The pedagogical approach presented in the text has been tried and tested over many years, and provides a constructive framework for students to learn fundamental accounting concepts and processes. Through the use of real company information and financial statements students will quickly appreciate the use of accounting information. The textbook clearly outlines to students how to account for typical business transactions and prepare financial statements - such as a balance sheet, income statement, and statement of cash flows - that communicate the financing, operating, and investing activities of a business. Whether a student is required to study one accounting subject, as part of a wider business degree, or undertake a major study of accounting the text builds a strong conceptual understanding of accounting and will develop skills that can be applied to an accounting and business environment. The integral role of financial statements for decision making is also emphasised in this text and is reinforced throughout by the Decision Toolkit in each chapter. Students are provided with an extensive set of tools necessary to make business decisions based on financial information. The fourth edition is designed to engage and educate students.

Accounting: Building Business Skills 4th edition continues to provide students and academics with a well written and accessible textbook, with ample illustrations and applications to business, for a first course in accounting. statements for decision making is also emphasised in this text and is reinforced throughout by the Decision Toolkit in each chapter. Students are provided with an extensive set of tools necessary to make business decisions based on financial information. The fourth edition is designed to engage and educate students.

The seventh edition of Birt's Accounting textbook is designed for the core accounting unit in a business or commerce degree. Many students who plan to major in soft-side disciplines such as marketing or human resource management need a clear and accessible text that emphasises the relevance of accounting to business. The Accounting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Ernst & Young, animated work problems and questions with immediate feedback. Birt's unique resource can also form the basis of a blended learning solution for lecturers.

Fulfil your workplace potential with this indispensable handbook. Written by a team of experts, *Business Skills All-in-One For Dummies* is your complete guide to perfecting your communication, management and organizational skills. Inside you'll find simple techniques for improving your performance at work - everything from presentation skills, project management, persuading and influencing people, motivating (yourself and others!), managing your workload, managing a team and much more. No other book offers you this much in one volume. It's like having a whole team of business, communication and management experts sitting on your bookshelf...but much less crowded! Inside you'll find 4 books in 1: Book I: Communicating Effectively (covering communication, presentations, body language, confidence, persuasion & influence) Book II: Building Your Commercial Acumen (covering accounting and budgeting, technology, selling, negotiation) Book III: Managing and Leading Others (recruiting, working in teams and groups, dealing with ethics and office politics, coaching, leadership) Book IV: Increasing Productivity and Performance (time management, project management, achieving goals, motivation, managing stress, organising time, managing meetings and dealing with emails).

*Accounting and Auditing Research, 10th Edition* prepares students and early-stage practitioners to use well-established research solutions in a broad range of practical applications, from financial accounting and tax planning, to investigating fraud and auditing various business problems. Emphasizing real-world skills development, this fully-updated textbook covers the current tools, techniques, and best practices in applied professional research and analysis. The authors provide comprehensive yet accessible coverage of the entire research process, explaining how to utilize major research databases and audit software packages in a clear and systematic manner. The tenth edition features carefully revised content designed to enhance effectiveness, increase readability, and strengthen learning and retention. The book's classroom-proven pedagogy features expert tips for performing common research tasks, sidebar boxes that summarize and expand upon key concepts, and a variety of end-of-chapter exercises that reinforce the material and develop readers' skills.
