This adventurous work records Robert Edison Fulton's solo round-the-world tour on a two-cylinder Douglas motorcycle between July, 1932 and December, 1933. First published in 1937.

Autumn is filled to the brim with reasons to get together with family & friends. Scrumptious tried & true recipes to suit every occasion...shared by home cooks from across the country. Both new recipes and old favorites with a twist.

"Industrial Maintenance and Mechatronics provides support for an Industrial Technology Maintenance (ITM) program. It covers the principal industrial technology disciplines, with a focus on electrical systems and electronic controls. It provides students with the necessary knowledge for entry-level positions in industrial maintenance and prepares them for NIMS Level 1 credentialing"--

This extraordinary account of a remarkable journey made in 1933, through Iraq, Iran and Baluchistan (now part of Pakistan) to India is packed full of wonder, adventure, determination and love of travel and motorcycles. But what really sets this book apart are the wonderful descriptions of the people and cultures, now nearly forgotten, yet still hugely relevant in today ' s age: all brought evocatively to life by the stunning photos from 1933. At that time, the idea of travelling to India on a motorcycle through the Middle East was considered impossible; there were often no roads, not even any paths, and they were attempting to cross the burning deserts in the middle of August, on a tiny two-stroke motorcycle with barely enough power for the bike and rider, let alone a pillion passenger! This book is more than a fantastic adventure; it also offers some perceptive insights into the peoples, places and cultures of the time, as well as being full of drama, both personal and mechanical, as the motorcycle is urged on across the shimmering sands. A true window on the past – and a book which is definitely a ' must have ' for all travel and motorcycle enthusiasts.

More Food: Road to Survival is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture More Food: Road to Survival is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.

At the beginning of the book (before Unit-1) the overview of the various concepts of management discussed in the book is given through dialogue box. This view has further been enlarged in Unit-3 also. It would be helpful to enhance the understanding of the subject. Throughout the book, ,running glossary is given headed as tool kit. The brief summary of the important Concepts and Key Terms is presented here. It would enable the readers to reinforce their learning. In the book, the case studies have also been included to enhance the practical knowledge of the subject. instant learning maps are given with a view to facilitating quick revision and I hope that the students will be really benefitted as it facilitates the work of revising the subject particularly during examination days. Match the Column and Comprehension Type Questions are given headed as appendix. At the end of each part query session is given to raise queries from the readers' side. Some possible queries have already been answered on the spot. Every aspect of the syllabus has been studied in detail so that the entire material relevant to the requirement of the syllabus becomes available in a single book. Every difficult fact has been presented with the help of examples and diagrams so that the subject can be easily and adequately comprehended. A list of questions that are important from the examination point of view has been given at end of each Unit. Every possible effort has been made to present the subject-matter in a simple, clear and interesting manner. Special efforts have been made to make the book error-free.

Guide C: Reference Data contains the basic physical data and calculations which form the crucial part of building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive section on units, mathematical and miscellaneous data. There are extensive and easy-to-follow tables and graphs. -Essential reference tool for all professional building services engineers -Easy to follow tables and graphs make the data accessible for all professionals -Provides you with all the necessary data to make informed decisions

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
