Drawing on her 18 years of experience working remotely, plus original interviews with managers, employees, and free agents who've perfected their remote routines, Laura Vanderkam shares strategies for productivity, creativity, and health in the new corner office. How do you do great work while

Online Library Wall Street

sitting near the same spot where you watch Netflix? How can you be responsive without losing the focus necessary for getting things done? How can you maintain and grow your network when you spend less time face to face? The key is to detach yourself from old ways of working and adopt new habits to

match your new environment. Long before public health concerns pushed many of us indoors, some of the most successful people fueled their careers with carefully perfected work-from-home routines. Drawing on those profiles and her own insights, productivity expert and mother of five Laura

Online Library Wall Street

Vanderkam reveals how to turn "being cooped up" into the ultimate career advantage. Her hacks include: □ Manage by task, not time. Going to an office for 8 hours makes you feel like you've done something, even if you haven't. Remote workers should set 3-5 ambitious goals for each day and consider the work day

Online Library Wall Street

done when these are
crossed off. □ Get the
rhythm right. A well-
planned day features
time for focused work,
interactive work, and
rejuvenating breaks. In
place of a commute, a
consciously chosen shut
down ritual keeps work
from continuing all
night. □ Nurture
connections. Wise
remote workers can

Florence Knoll
(1917–2019) was a leading force of modern design. She worked from 1945 to 1965 at Knoll Associates, first as business partner with her husband Hans

Knoll, later as president after his death, and, finally, as design director. Her commissions became hallmarks of the modern era, including the Barcelona Chair by Mies van der Rohe, the Diamond Chair by Harry Bertoia, and the Platner Collection by Warren Platner. She created classics like the

still in production today.
Knoll invented the
visual language of the

Knoll's motto was "no

demolishes the long-

who work with their hands make up a less intelligent class. He shows us waitresses making lightning-fast calculations, carpenters handling complex spatial mathematics, and hairdressers, plumbers, and electricians with their aesthetic and diagnostic acumen. Rose, an educator who is himself the son of a

waitress, explores the intellectual repertory of everyday workers and the terrible social cost of undervaluing the work they do. Deftly combining research, interviews, and personal history, this is one of those rare books that has the capacity both to shape public policy and to illuminate general readers.

A retired Wall Street Journal editor and mother compares two generations of women—boomers and GenXers—to examine how each navigates the emotional and professional challenges involved in juggling managerial careers and families. For the first time in American

history, a significant number of mothers are heading major corporations, including General Motors, Ulta Beauty, and Best Buy. Over the past several decades, women have made gains throughout executive suites. Yet these "Power Moms" still struggle with balancing their management

Online Library Wall Street

responsibilities with raising children. Joann S. Lublin draws on the experiences of the nation's two generations of these successful women to measure how far we've come—and how far we still need to go. Lublin combines her own insights with those of eighty-five executive mothers across industries—including

Online Library Wall Street

experienced public-company chiefs such as Carol Bartz, the first woman to command Autodesk and Yahoo; Hershey's Michele Buck, DuPont's Ellen Kullman, ITT's Denise Ramos, and WW International's Mindy Grossman—and twenty-five of their grown daughters. Lublin reveals how trailblazer

boomers, many now in their sixties, often endured sweeping disapproval for their demanding management careers, even as their own daughters sometimes rejected their choices. While the second wave of executive mothers—all under forty-five—handle working parenthood with less angst, they still

lead stressful lives.

Power Moms provides lessons and advice to help today's

professional women, their families, and their employers navigate this challenging terrain.

Lublin looks at the trade-offs mothers are too often forced to make between work and family and the root causes, including the

women have made,
