This collection of essays, based on international collaboration by scholars in Japan, South Korea, Taiwan, and the United States, is the first systematic, interdisciplinary attempt to address the social, political, and spiritual significance of the modern arts both in Japan and its empire between 1920 and 1960. These forty years, punctuated by war, occupation, and reconstruction, were turbulent and brutal, but also important and even productive for the arts. The volume takes a trans-war (rather than an inter-war) approach, beginning with the cultural politics of painting, poetry, and fiction in Japanese-occupied Korea and Taiwan following World War I. The narrative continues with the impact of Japan's war in China and the Pacific War on major Japanese novelists, playwrights, painters, and filmmakers, before moving on to the final stage, Japan's defeat and initial recovery. During the Allied Occupation of Japan and in its aftermath, Japanese artists both confronted and dismissed the question of war responsibility by preserving, reviving, or reinventing the political cartoon, Kabuki drama, literature of the body, and the aesthetics of decadence. Contributors: Haruko Taya Cook, Kyoko Hirano, Youngna Kim (Kim Youngna), H. Eleanor Kerkham, David R. McCann, Marlene J. Mayo, J. Thomas Rimer, Mark H. Sandler, Rinjiro Sodei, Wang Hsui-hsiung (Wang Xiuxiong), Alan Wolfe, Angelina C. Yee.

Cultural Responses to Occupation in Japan examines how the performing arts, and the performing body specifically, have shaped and been shaped by the political and historical conditions experienced in Japan during the Cold War and post-Cold War periods. This study of original and secondary materials from the fields of theatre, dance, performance art, film and poetry, probes the interrelationship that exists between the body and the nation-state. Important artistic works, such as Ankoku Butoh (dance of darkness) and its subsequent re-interpretation by a leading political performance company Gekidan Kaitaisha (theatre of deconstruction), are analysed using ethnographic, historical and

theoretical modes. This approach reveals the nuanced and prolonged effects of military, cultural and political occupation in Japan over a duration of dramatic change. *Cultural Responses to Occupation in Japan* explores issues of discrimination, marginality, trauma, memory and the mediation of history in a ground-breaking work that will be of great significance to anyone interested in the symbiosis of culture and conflict.

An authoritative overview of current debates and approaches within the study of Japan's history Composed of 30 chapters written by an international group of scholars Combines traditional perspectives with the most recent scholarly concerns Supplements a chronological survey with targeted thematic analyses.

This is the first book to describe the way in which the traditional and modern forms of Japanese theater responded to Japan's defeat in World War II. It includes sixteen essays by thirteen specialists demonstrating the triumphs and tribulations of Japanese theater during the Allied Occupation, 1945–1952.

According to a myth constructed after Japan's surrender to the Allied Forces in 1945, kabuki was a pure, classical art form with no real place in modern Japanese society. Drawing extensively from Japanese sources, Brandon shows that kabuki played an important role in Japan's Fifteen-Year Sacred War.

Iconographies of Occupation is the first book to address how the [collaborationist] Reorganized National Government (RNG) in Japanese-occupied China sought to visualize its leader, Wang Jingwei (1883–1944); the Chinese people; and China itself. It explores the ways in which this administration sought to present itself to the people over which it ruled at different points between 1939, when the RNG was first being formulated, and August 1945, when it folded itself out of existence. What sorts of visual tropes

Download Ebook War Occupation And Creativity Japan And East Asia 1920 1960

were used in regime iconography and how were these used? What can the intertextual movement of visual tropes and motifs tell us about RNG artists and intellectuals and their understanding of the occupation and the war? Drawing on rarely before used archival records relating to propaganda and a range of visual media produced in occupied China by the RNG, the book examines the means used by this "client regime" to carve out a separate visual space for itself by reviving prewar Chinese methods of iconography and by adopting techniques, symbols, and visual tropes from the occupying Japanese and their allies. Ultimately, however, the "occupied gaze" that was developed by Wang's administration was undermined by its ultimate reliance on Japanese acquiescence for survival. In the continually shifting and fragmented iconographies that the RNG developed over the course of its short existence, we find an administration that was never completely in control of its own fate—or its message. *Iconographies of Occupation* presents a thoroughly original visual history approach to the study of a much-maligned regime and opens up new ways of understanding its place in wartime China. It also brings China under the RNG into dialogue with broader theoretical debates about the significance of "the visual" in the cultural politics of foreign occupation.

Haikai is an art that parodies and often subverts its linguistic, generic, and personal predecessors, and its intersections include imaginative links to the rest of Japanese literature and culture. This collection of essays explores certain neglected aspects of this haikaimaster's literary and philosophical contributions.

This book charts comprehensively the various discoveries in Southeast Asia and the Pacific of Japanese soldiers still fighting the Second World War many years after it had ended. It explores their return to Japan and their impact on the Japanese people, revealing changing attitudes to war veterans and war casualties' families, as well as the ambivalence of memories of the war.

Download Ebook War Occupation And Creativity Japan And East Asia 1920 1960

The attack on Pearl Harbor, which precipitated the Greater East Asia War and its initial triumphs, aroused pride and a host of other emotions among the Japanese people. Yet the single year in which Japanese forces occupied territory from Alaska to Indonesia was followed by three years of terrible defeat. Nevertheless, until the shattering end of the war, many Japanese continued to believe in the invincibility of their country. But in the diaries of well-known writers including Nagai Kafu, Takami Jun, Yamada Futaru, and Hirabayashi Taiko and the scholar Watanabe Kazuo, varying doubts were vividly, though privately, expressed. Donald Keene, renowned scholar of Japan, selects from these diaries, some written by authors he knew well. Their revelations were sometimes poignant, sometimes shocking to Keene. Ito Sei's fervent patriotism and even claims of racial superiority stand in stark contrast to the soft-spoken, kindly man Keene knew. Weaving archival materials with personal recollections and the intimate accounts themselves, Keene reproduces the passions aroused during the war and the sharply contrasting reactions in the year following Japan's surrender. Whether detailed or fragmentary, these entries communicate the reality of false victory and all-too-real defeat.
