The growing tension between mother and daughter combined with preparations for the wedding impact on both family and friends. In this compelling and unashamedly romantic tale of finding love in later life, the experience of a young care-leaver who is tasked with making the wedding bouquet, is skilfully intertwined with the family's – sometimes turbulent– preparations for a modern wedding.

Established in 1865 by Carl Klemer, the Faribault Woolen Mill is an authentic example of American craftsmanship. In 150 years of business, the company's success has relied on stewardship from the Klemer, Johnson and Mooty families, as well as veteran employees. Despite a devastating fire and even a closing, today it is the oldest manufacturer in Minnesota and one of the country's last mills producing textiles from raw wool. Its blankets provided warmth to hundreds of thousands of American troops in both world wars, and the mill continues that tradition of military support today. Discover the history and heritage woven into this iconic American brand revered around the world.

Traditional text types (or genres) are complex linguistic, sociocultural and cognitive phenomena that can only be analysed in flexible interdisciplinary frameworks fusing structural and process-oriented approaches and combining quantitative description with qualitative interpretation and evaluation. The theoretical and methodological implications of the prototypical text type concept which is developed in this book are explored in an exhaustive case study of a representative (ie prototypical) genre: the wedding report, a conventional type of news report published in local English newspapers. The distinctive contextual and textual features — situational context, text production processes, function, thematic structure, and form on the macro- and microlevel — are analysed synchronically and diachronically. The linguistic findings are integrated into a comprehensive view of the interplay between the genre as a linguistic frame and its sociocultural context. The study puts special emphasis on addressing the methodological problems arising from the inherent fuzziness of traditional text types, and can thus serve as a detailed working model of genre analysis, designed to be adapted to the specific requirements of similar studies.
