This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables

Why does Western civilization dominate the rest of the world? This book is a summary of “ Civilization: The West and the Rest, ” by Niall Ferguson. The central question is: Why did the West dominate the Rest and not vice versa? The book describes six concepts that the West has developed that allow them to leap ahead of the Rest, unleashing the Industrial Revolution and increasing human productivity. Six hundred years ago, Ming China and Ottoman Turkey dominated the world civilizations, while Western Europe was a miserable backwater, devastated by incessant war and disease. But today, Western civilization has risen to global dominance. How has the West overtaken its Eastern rivals in the past 500 or so years? In Civilization, Niall Ferguson argues that beginning in the 15th century, the West developed six powerful concepts that the Rest lacked: competition, science, property rights, medicine, consumerism, and work ethic. These six killer apps allowed the West to leap ahead of the Rest, unleashing the Industrial Revolution and increasing human productivity. Yet now, the days of Western predominance are numbered because the Rest are adopting these same concepts, while the West has lost faith in its own civilization. Read this book and learn how these six killer apps help the West

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

Since the 1970s, a 'critical' movement has been developing in the humanities and social sciences denouncing the existence of 'Western dominance' over the worldwide production and circulation of knowledge. However, thirty years after the emergence of this

Access Free Western Dominated World Guided Reading Answer Key Section 1

promising agenda in International Relations (IR), this discipline has not experienced a major shift. This volume offers a counter-intuitive and original contribution to the understanding of the global circulation of knowledge. In contrast to the literature, it argues that the internationalisation of social sciences in the designated 'Global South' is not conditioned by the existence of a presumably 'Western dominance'. Indeed, although discriminative practices such as Eurocentrism and gate-keeping exist, their existence does not lead to a unipolar structuration of IR internationalisation around 'the West'. Based on these empirical results, this book reflexively questions the role of critique in the (re)production of the social and political order. Paradoxically, the anti-Eurocentric critical discourses reproduce the very Eurocentrism they criticise. This book offers methodological support to address this paradox by demonstrating how one can use discourse analysis and reflexivity to produce innovative results and decentre oneself from the vision of the world one has been socialised into. This work offers an insightful contribution to International Relations, Political Theory, Sociology and Qualitative Methodology. It will be useful to all students and scholars interested in critical theories, international political sociology, social sciences in Brazil and India, knowledge and discourse, Eurocentrism, as well as the future of reflexivity.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* “A dazzling history of Western ideas.” —*The Economist* “Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase.” —*Wall Street Journal* “[W]ritten with vitality and verve . . . a tour de force.” —*Boston Globe* Western civilization’s rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or “killer applications” —competition,

science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

A Reader's Guide to Contemporary Literary Theory is a classic introduction to the complex yet crucial area of literary theory. This book is known for its clear, accessible style and its thorough, logical approach, guiding the reader through the essentials of literary theory. It includes two new chapters: 'New Materialisms' which incorporates ecocriticism, animal studies, posthumanism and thing theory; '21st Century and Future Developments' which includes technology, digital humanities, ethics and affect.

Combining theory, comparative politics, and international relations, *Introduction to Politics* provides a perfect introduction to the subject for students embarking on university-level study. As the only introductory text to cover both comparative politics and international relations, and contextualise this material with a wide range of international examples, it is the most comprehensive, authoritative, and global introductory politics textbook on the market. Written by three experts in the field, this book takes a

balanced approach to the subject, serving as a strong foundation for further study. The material is explored in an accessible way for introductory study, but takes an analytical approach which encourages more critical study and debate, helping students to develop the vital skills they need for a politics degree. An Online Resource Centre accompanies this text, and includes a range of resources for both students and lecturers. For students - Learn more about the people behind the theory with the 'Key Thinkers' resource. - Test your understanding of the chapter content and receive instant feedback with self-marking multiple-choice questions. - Revise key terms and concepts with an online flashcard glossary. For registered lecturers - Encourage students to think critically with political scenario exercises. - Reinforce key themes from each chapter with suggested discussion questions for use in seminars. - Use the adaptable PowerPoint slides as the basis for a lecture presentation, or as hand-outs in class. - Save time preparing assessments and seminars with a fully updated test bank of questions.

Spengler's work describes how we have entered into a centuries-long "world-historical" phase comparable to late antiquity, and his controversial ideas spark debate over the meaning of historiography.
