Traditionally, fashion trend forecasting is conducted through a human-based process that relies heavily on designers' artistic viewpoints. However, with the emergence of data science and the increasing availability of data inputs from consumers, the possibility of using big data tools to forecast fashion trends is attracting growing interest among the academia and practitioners in the fashion industry.

An understanding of trends is a fundamental skill for anyone working in the fashion industry. In this book Gwyneth Holland and Rae Jones look at how to produce a well-researched trend, from initial inspiration to concrete idea and, eventually, real product. Illustrated throughout with insights from practicing trend forecasters and industry insiders, it is an invaluable guide for fashion students and practitioners alike.

In a fast-moving global industry, how can anyone know what the next trend will be? Fashion Trends: Analysis and Forecasting offers a clear pathway into the theory and practice of forecasting fashion, using professional case studies to demonstrate each technique and concept. This revised edition includes an updated model of the fashion trend analysis and forecasting process and expanded coverage of social media, digital influencers, sustainability and social responsibility. There are also first-hand visual materials relating to forecasts from leading firms. With the rise of individualism and concern for the sustainable world, the authors also walk you through the 'end of fashion' and what comes next, including: recycled and upcycled fashion, garment rental, subscription services, the circular economy, transparency and traceability, and the role of forecasting in encouraging sustainable lifestyles. Key topics □ The characteristics of an innovation □ The influence of consumer groups □ Long- and short-term fashion forecasting □ Sociocultural factors and their influence on trends □ Fashion professionals' roles in creating and supporting trends □ Consumer and industry trends accelerating product innovation and diffusion □ Changing trend forecasting formats □ The influence of trend forecasting on business decisions

With real life industry examples and case studies, this text provides students with the knowledge and practices used by professionals to forecast fashion trends.

The fashion business has been collecting and analyzing information about colors, fabrics, silhouettes, and styles since the 18th century - activities that have long been shrouded in mystery. The Fashion Forecasters is the first book to reveal the hidden history of color and trend forecasting and to explore its relevance to the fashion business of the past two centuries. It sheds light on trend forecasting in the industrial era, the profession's maturation during the modernist moment of the 20th century, and its continued importance in today's digital fast-fashion culture. Based on in-depth archival research and oral history interviews, The Fashion Forecasters examines the entrepreneurs, service companies, and consultants that have worked behind the scenes to connect designers and retailers to emerging fashion trends in Europe, North America, and Asia. Here you will read about the trend studios, color experts, and international trade fairs that formalized the prediction process in the modern era, and hear the voices of leading contemporary practitioners at international forecasting companies such as the Doneger Group in New York and WGSN in London. Probing the inner workings of the global fashion system, The Fashion Forecasters blends history, biography, and ethnography into a highly readable cultural narrative.

Worth Global Style Network WGSN maintains a huge database with reports on fashion trends as they are created and/or spotted in the streets, on the catwalks, in the shops, at trade fairs, in the industry, worldwide. Includes an abundance of photographic and graphic materials. WGSN provides fashion and design businesses with the intelligence to drive commercially successful products and services.

Everyone in the fashion business needs to develop an essential survival skill: how to interpret the intelligence provided by the fashion forecasting industry, to anticipate and respond to emerging trends. Lavishly illustrated in full colour throughout, with clear and relevant explanations of the processes involved, Fashion Forecasting is for fashion students and young professionals who already have acquired some fashion knowledge and skills. The authors interviewed the key players within this exciting industry and provide here fascinating insights into the dynamic contemporary fashion forecasting world and the varied creative roles within it - from intelligence gatherers to project consultants. The book covers how a trend is sourced, anticipated and developed, and also explores the interaction with marketing and brand development.

Fashion Forward demystifies the exciting career of a fashion forecaster and fosters skills that will benefit any design professional. The book begins with an overview of fashion forecasting theories and concepts and then leads readers through a step-by-step guide to creating and presenting a forecast. The authors reveal the inner workings of global fashion forecasting through real-world examples and interviews with both influential forecasters and the designers who rely upon them. Fashion Forward enables readers to start spotting tomorrow's trends today and compellingly communicate them-both visually and verbally-to inspire fashion innovators. New to this Edition - Current images and examples. Updated fashion photos to include current and trending images, professional presentations and forecast examples, plus new interviews and quotes. - Covers the latest methods and technology. New coverage of social media, technology and data analytics practices in fashion forecasting. - Enhanced global perspective. New content addressed the global apparel industry, emphasizes international forecasting firms, includes interviews with global forecaster and trend specialists, and more diverse images and examples throughout the book. - Practical career information and hands-on application. Updated and expanded career opportunities sections and enhanced activities provide real-world simulations and insights. - New online STUDIO resources offer students self-study quizzes, flashcards, additional projects and online resources. To receive free access to the STUDIO content with new copies of this book, please refer to the book + STUDIO access card bundle ISBN 9781501328350.

The colour forecasting process is a major driving force in the fashion and textile industries but is complex, highly intuitive and little understood. This textbook for students of fashion and design discusses the development of the various driving forces of fashion, when colour forecasting began and how it has developed to its present day state. Colour terminology and some of the more subjective tools used by colour forecasters are explained, and their strengths and weaknesses are compared. Also, a model is given of the colour forecasting process and this is discussed in detail. Finally, readers are shown how forecasting methodologies are used to develop 'colour stories'.

From Charles Frederick Worth to Nicolas Ghesquière, designers have propelled fashion from an elite craft into a cornerstone of contemporary popular culture. This brilliantly written analysis of the achievements of the 50 greatest names in international fashion explores their lives, both personal and professional, drawing on the latest academic research and on the best of fashion journalism, including the authors' own interviews with designers spanning a 30-year period. The designers' working methods and career highlights are outlined in detailed and wittily written entries that capture the spirit of their times. From Poiret and Patou to Gernreich and Galliano, the sometimes provocative selection of 50 names poses stimulating questions about the definition of a fashion designer in the modern era. A ground-breaking book, this is a definitive introduction to fashion designers that is essential reading for both students and general readers alike.
