Designed as an undergraduate-level textbook in Chemical Engineering, this student-friendly, thoroughly class-room tested book, now in its second edition, continues to provide an in-depth analysis of chemical engineering thermodynamics. The book has been so organized that it gives comprehensive coverage of basic concepts and applications of the laws of thermodynamics in the initial chapters, while the later chapters focus at length on important areas of study falling under the realm of chemical thermodynamics. The reader is thus introduced to a thorough analysis of the fundamental laws of thermodynamics as well as their applications to practical situations. This is followed by a detailed discussion on relationships among thermodynamic properties and an exhaustive treatment on the thermodynamic properties of solutions. The role of phase equilibrium thermodynamics in design, analysis, and operation of chemical separation methods is also deftly dealt with. Finally, the chemical reaction equilibria are skillfully explained. Besides numerous illustrations, the book contains over

Rolling hills, rich forests, and beautiful vistas have made Brown County, Indiana, a favorite haunt of painters and ordinary tourists. In this gorgeous collection, landscape photographer Gary Moore reveals the spirit of the place in the morning hours as it awakens to the new day. Complementing Moore's wonderful photographs is a text by James P. Eagleman, one of the area's lifelong naturalists, which showcases the county's unique flora and fauna. Included with more than 100 color landscape photographs are Moore's tips on composition, atmosphere, and lighting, encouraging readers to test their creativity with whatever equipment they possess. A book to treasure, Brown County Mornings beckons visitors to enjoy this magical place at any time of day or year.
