From "the most important voice to have entered the political discourse in years" (Bill Moyers), a scathing critique of the two-tiered system of justice that has emerged in America From the nation's beginnings, the law was to be the great equalizer in American life, the guarantor of a common set of rules for all. But over the past four decades, the principle of equality before the law has been effectively abolished. Instead, a two-tiered system of justice ensures that the country's political and financial class is virtually immune from prosecution, licensed to act without restraint, while the politically powerless are imprisoned with greater ease and in greater numbers than in any other country in the world. Starting with Watergate, continuing on through the Iran-Contra scandal, and culminating with Obama's shielding of Bush-era officials from prosecution, Glenn Greenwald lays bare the mechanisms that have come to shield the elite from accountability. He shows how the media, both political parties, and the courts have abetted a process that has produced torture, war crimes, domestic spying, and financial fraud. Cogent, sharp, and urgent, this is a no-holds-barred indictment of a profoundly un-American system that sanctions immunity at the top and mercilessness for everyone else.

In the century between the "Emancipation Proclamation" of Abraham Lincoln and the "I Have a Dream" speech of Martin Luther King Jr., America sought both to rebuff and to redeem the promise of "liberty and justice for all." The story of slavery and the bloody civil war that abolished it has been told, but the story of the struggle for liberty and justice by and for African Americans in the half-century following the end of Reconstruction has been largely overlooked. In this highly readable narrative, distinguished historian Ronald C. White Jr. portrays the people, their ideas, and their ongoing struggle for racial reform in the United States from

1877-1925--a vital prelude to the modern civil rights movement and Martin Luther King, Jr.

From the congressional debate over the "fall of China" to the drama of the Army-McCarthy hearings to the kitchen faceoff between Richard Nixon and Nikita Khrushchev, the political history of the early Cold War was long dominated by studies of presidential administrations, anticommunism, and foreign policy. In *Liberty and Justice for All?* a group of distinguished historians representing a variety of disciplinary perspectives--social history, cultural history, intellectual history, labor history, urban history, women's history, African American studies, and media studies--expand on the political history of the early Cold War by rethinking the relationship between politics and culture. How, for example, did folk music help to keep movement culture alive throughout the 1950s? How did the new medium of television change fundamental assumptions about politics and the electorate? How did American experiences with religion in the 1950s strengthen the separation of church and state? How did race, class, and gender influence the relationship between citizens and the state? These are just some of the questions addressed in this wide-ranging set of essays. In addition to volume editor Kathleen G. Donohue, contributors include Howard Brick, Kari Frederickson, Andrea Friedman, David Greenberg, Grace Elizabeth Hale, Jennifer Klein, Laura McEnaney, Kevin M. Schultz, Jason Scott Smith, Landon R. Y. Storrs, and Jessica Weiss.

The intention of this book is to provide a better understanding of the mission of public interest lawyers and stimulate thought about ways to energize and build a movement that advances social justice. I could not have succeeded in this effort without the help and support of many individuals and institutions. I wish to express my appreciation for their assistance. I am very grateful to the Board of Directors of the Alliance for Justice for its wisdom in establishing the Alliance and for its continuing support for this book and other important projects. I profited from discussion with many public interest lawyers, activists and foundation officers. These individuals, who are listed in Appendix D, gave generously of their time. A few merit special attention. Charles Halpern and the staff at the Council for Public Interest Law, who wrote *Balancing the Scales of Justice: Financing Public Interest Law in America*, provided a wonderful model for me to follow.

*Equality in Liberty and Justice* is an integrated collection of essays in political philosophy, divided into two parts. The first examines (classically) liberal ideas--the ideas of the Founding Fathers of the American republic--and some of the applications and the rejections of such ideas in our contemporary world. Among other questions about liberty and responsibility it considers, in the context of the imprisonment and psychiatric treatment of dissidents in the psychiatric hospitals of the former Soviet Union, Plato's suggestion that all delinquency is an expression of mental disease. The second part examines the relations and the lack of relations between old fashioned, without prefix or suffix, justice and what is called by its promoters social justice. It therefore presses such questions as "Equal outcomes or equal justice?" and "Enemies of poverty or of inequality?" *Equality in Liberty and Justice* was originally published before the winning of the Cold War and the collapse of the Soviet Empire. This second edition updates the arguments of the previous editor and draws present day moral conclusions. This book will appeal to those for whom the classical liberal and conservative debates still have great meaning. Few might well be the most significant synthesizer of Tocqueville and Mill.
