new section, Notification of Purpose and Limits of Confidentiality, has been added and new material on background information and the use of collateral information has been included. New examples have been added to supplement and clarify the text and a new example of a full report is presented. The Recommendations section has also been modified to incorporate specific strengths and problem areas. This book offers a wealth of descriptive information, organizing questions, guidelines, and other strategic information to make your written report as clear, comprehensive, and error free as possible.

Provides a systematic approach to writing psychological reports for optimal clarity, thoroughness, and impact A clinical report should have all the clarity and precision of a military dispatch. Unfortunately, as anyone who deals with psychological reports knows, this is almost never the case. Extensive research has shown that with most psychologist's reports, there is a dangerously wide gap between author intent and reader interpretation. Since the quality of clinical reports can have a direct bearing on the quality of care a client receives —especially in an age of managed care —it is essential that psychologists arm themselves with a systematic approach to creating reports that in structure, content, and style have the utmost clarity, thoroughness, and utility. Psychological Reports, Third Edition, provides them with such an approach. The book begins with a theory-based analysis of report-writing problems, which is then used to construct a framework for identifying and correcting them. A valuable working resource for practicing psychologists and psychotherapists, Psychological Reports, Third Edition, is also must reading for students and psychologists-in-training. A complete guide to writing effective reports for a variety of contexts Updated to correspond to recent changes in the DSM-IV Includes practice exercises that help readers build report-writing skills Features sample reports representing a wide range of applications.

updated for DSM-5/ICD-10-CM and newer types of evaluations. In a convenient large-size format with lay-flat binding, the book covers nearly all areas of concern addressed in intakes, evaluations, treatment plans, progress notes, and closing summaries. The user seeking the right wording for a clinical document can skim and select from thousands of technical terms, behavioral descriptors, and standard statements. Also provided are interview questions for almost every symptomatic behavior, a huge collection of mental status questions, a reproducible Mental Status Evaluation summary form, and links to hundreds of Internet resources. The periodically updated companion website offers all the URLs from the book, the reproducible forms, and a handy reference on current psychiatric medications. New to This Edition *A list of all psychiatric ICD-10 diagnoses (all of the codes in DSM-5, plus many more), including Z codes essential to a comprehensive biopsychosocial evaluation. *Sample evaluation report keyed to the book's chapters. *Sections on additional clinical issues: intimate partner violence, gender identity, human trafficking, recovery-oriented language, and more. *Many more Internet links, including a wide variety of screening and assessment tools. See also *The Paper Office for the Digital Age, Fifth Edition*, by Edward L. Zuckerman and Keely Kolmes, which provides the essential record-keeping and risk-reduction tools that every psychotherapy practice needs.

"This book represents a natural evolution from the author's work with editing assessment reports and is specifically structured to meet the writing and communicating needs of the psychologist assessor. A combination of reference book and tutorial, *Writing to Clients* elucidates the qualities that create a writer's unique presence on the page with illustrations of correct English grammar, and is appropriate for graduate psychology students and for practicing professionals. In addition to style and grammar, the author details how to write less formal reports in letter form and to write a therapeutic story as an extension of the report for child, teenager, or adult"--

The bestselling guide to reporting writing, updated and reworked for today's practice *Essentials of Assessment Report Writing* offers effective solutions to the creation of reader-friendly, yet targeted, psychological, and educational assessment reports. Parents, clinicians, clients, and other readers need more than test-by-test descriptions—they need an accessible analysis of the entire situation to determine their next steps. This book provides clear guidance for busy practitioners seeking ways to improve their report writing skills. With a focus on current practice, this new second edition covers DSM-5 updates and the latest assessment instruments including the WJ IV, WISC-V, WAIS-IV, KTEA-3, and the CAS2. New discussion includes advice on tailoring the report to the audience, and annotated case reports provide illustrative models of effective report styles, interpretation, and analysis. Key concepts are highlighted for quick reference throughout, and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field, in both content and style; there is no definitive "standard," but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide high-quality, accessible reports. Integrate assessment results to provide a person-centered report Identify and navigate critical decision points in the interpretive process Write efficiently yet effectively while enhancing the reader's experience Provide an accurate,

Outlining a step-by-step assessment model, Psychological Assessment and Report Writing, Second Edition covers five key topics central to psychological assessment: understanding the context of a referral; determining what data is needed to answer referral questions; gathering the data; integrating the data; and communicating the findings. Authors Karen Goldfinger and Andrew M. Pomerantz review each facet of psychological assessment and report writing—providing how-to instructions and alerting readers to a myriad of issues they must consider when conducting assessments in clinical, forensic, or educational environments. Filled with varied case examples that promote interest and meet instructional requirements, including one detailed case study that recurs throughout multiple chapters, the book uses sidebars and question and answer sections to encourage readers to consider their own case material and use critical thinking skills as they review each section of the model.
