If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

The book is written in three parts. Part I consists of preparatory work on algebras, needed in Parts II and III. Part II consists of a modern description of the theory of Brauer groups over fields (from as elementary a point of view as possible). Part III covers some new developments in the theory which, until now, have not been available except in journals.

That's so fetch! The Mean Girls Magnets mini kit features 10 magnets emblazoned with some of the most memorable one-liners from the comedic masterpiece. Also included is a 32-page mini "Burn Book" with quotes and images from the 2004 film. Magnets feature the following grool phrases: On Wednesdays we wear pink You go Glen Coco She doesn't even go here So you agree? You think you're really pretty? Is butter a carb? SO fetch Get in loser, we're going shopping I'm a mouse, duh I'm not like a regular mom. I'm a cool mom. Boo, you whore

* Offers timely material, and is anticipated that over 80% of Fortune 1000 companies will incorporate mobile devices and wireless applications into their existing systems over the next two-five years. * Authors utilize XML and related technologies such as XSL and XSLT as well as Web services for server-sided application construction. * Details how to build a complete enterprise application using all of the technologies discussed in the book. * Web site updates the example application built as well as additional wireless Java links and software.

Sometimes you know things you're not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? And so begins Landon's journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A short story mystery perfect for fans of Robert Dugoni's *Third Watch* and Dean Koontz's *The Neighbor*. Read as a standalone or as the companion book to *A Secondhand Life*.

This fast-access, pocket-sized handbook offers a "just the facts" approach to the practical uses of nuclear cardiology. Its case-based coverage includes methodology, application and results in clinical cardiology.

Enna is a girl who doesn't believe in herself and often utters the phrase "I can't do that!" One night in a dream she sees all the possible future versions of herself, discovering that she can be any of those versions with time, knowledge and dedication. She develops a growth mindset throughout her journey and instead of saying "I can't do that," she learns to say "I can't do that YET!".
