The COURAGE Handbook ushers its reader into the world of the compellingly rich heritage of cultural opposition in Eastern Europe. It is intended primarily to further a subtle understanding of the complex and multifaceted nature of cultural opposition and its legacy from the perspective of the various collections held in public institutions or by private individuals across the region. Through its focus on material heritage, the handbook provides new perspectives on the history of dissent and cultural non-conformism in the former socialist countries of Central, Eastern, and Southeastern Europe. The volume is comprised of contributions by over 60 authors from a range of different academic and national backgrounds who share their insights into the topic. It offers focused discussions from comparative and transnational perspectives of the key themes and prevailing forms of opposition in the region, including non-conformist art, youth sub-cultures, intellectual dissent, religious groups, underground rock, avantgarde theater, exile, traditionalism, ethnic revivalism, censorship, and surveillance. The handbook provides its reader with a concise synthesis of the existing scholarship and suggests new avenues for further research.

This book constitutes the thoroughly refereed post-proceedings of the 18th International Workshop on Implementation and Applications of Functional Languages, IFL 2006, held in Budapest, Hungary, in September 2006. The 15 revised full papers presented went through two rounds of reviewing and improvement and were selected from 40 workshop presentations. The papers address all current theoretical and methodological issues on functional and function-based languages such as language concepts, concurrent/parallel programming, type checking, concurrent/parallel program execution, compilation techniques, heap management, generic programming techniques, runtime profiling, (abstract) interpretation, performance measurements, automatic program generation, debugging and tracing, (abstract) machine architectures, verification, formal aspects, tools and programming techniques, array processing and demos of well working, useable tools and applications in functional languages.

Seminar paper from the year 2011 in the subject Politics - International Politics - Topic: European Union, grade: 1,0, University of Bucharest, language: English, abstract: 1. Introduction If the European Union wants to be a serious actor on world stage they need more strategic thoughts and above all the real and permanent will of the Member States acting together. The national states are too small for the challenges of our epoch. How to save the climate, guarantee security or offer economic prosperity, if all these topics are interweaved within the international system? Moreover a new constellation in the international policy becomes obvious. The unipolar moment of the

USA is over. With the rise of China and India the multipolar world will be more and more important. Therefore a new balance has to be created by those states. The European Union has no choice: It has to take up these challenges but it has also the potential to develop the rules of the new world order. The EU makes 35 percent of the world production and the world's biggest exporter of goods.¹ Its population is with more than 500 million inhabitants bigger than the population of Russia and USA together. The lack of the common foreign policy is so serious because European Union is liable to break down as an actor in the world policy. Its political and economic interests reach clearly over its territory. Moreover the European Union is affected directly from crisis or conflicts concerning raw material supply or energy supply. Relating to security policy the European Union is currently threatened by really different groups (from Al-Qaida to Somali pirates). Because of those problems the EU has to be incomprehensible as a global actor. Just because working together in the foreign policy is so important this paper has the goal to find out whether the Member States of the EU are able to cooperate concerning current crisis in Libya. Therefore follows at first a short historical overview about the historical steps to come closer to a common foreign policy in the EU. Then there is a short summary about the intervention of Libya. After that you have to analyze the behavior of the most influential Member States (France, Great Britain and Germany) because if they have common position in the field of foreign policy it is more easier for the EU to reach a common point of view for all Members. Last but not least you have to come to a conclusion whether a European Union common foreign policy exist or not.

This new edition of Historical Dictionary of the European Union has a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on important personalities, member states, internal policies, external relations, basic theories, treaties, and law. This book is an excellent access point for students, researchers, and anyone wanting to know more about the European Union.

Championing an approach to political culture and political discourse from an "internal perspective," this work investigates meanings in Hungarian politics around the start of the twenty-first century.

This study explores the connection between politics and historical scholarship in the case of the Hungarian historian, Gyula Szekfü, whose career spanned one of the most significant and eventful periods of Hungarian history. His writing is particularly suited for an inquiry into the relationship between politics and historiography because the changes in Szekfü's political and historical points of view paralleled the drastic changes which occurred in Hungary.
